

## MARIANNE DYSON

### Award-winning author and former NASA flight controller

*Inspired by the Apollo moon landings which she watched as a child, Marianne Dyson knows firsthand that space motivates kids to achieve. "I was so determined to be part of the space program that I worked extra hard to get good grades, especially in math." She was the first woman in her family to graduate from college, earning a degree in physics cum laude, and became one of the first women flight controllers for NASA. She left NASA to raise her children and now shares her passion for space through writing and presentations.*

Books will be autographed on day of appearance.
