

MARIANNE DYSON

Award-winning author and former NASA flight controller

Inspired by the Apollo moon landings which she watched as a child, Marianne Dyson knows firsthand that space motivates kids to achieve. "I was so determined to be part of the space program that I worked extra hard to get good grades, especially in math." She was the first woman in her family to graduate from college, earning a degree in physics cum laude, and became one of the first ten women flight controllers for NASA. She left NASA to raise her children and now shares her passion for space through writing and presentations. Visit Dyson's Web site **for information on author visits: www.mdyson.com**.

Books will be autographed and mailed within 30 days of receipt of payment.
