

Earth and moon images for *Scaling the Moon Activity*, page 47 of **Home on the Moon** (National Geographic) by Marianne Dyson. Copies may be made for personal use only.

Near side full moon

Cut out and paste images onto cardboard circles, 4 inches in diameter (Earth) and 1 inch in diameter (moon).
Night side of Earth, showing North and South America. Use white dots for city lights. Color land black, water and ice gray.

Far side full moon. Remember, only one side can be full at a time! Put white dots for future lunar city lights on the side that is in nightspan.
